Green = Database is pre-installed on your DreamFactory instance and also pre-configured as a service on your DreamFactory instance. All required drivers are installed. It's ready to use with no additional setup required.

✔ = All required drivers are installed. For databases you must use the admin console to configure a service on your DreamFactory instance.

( ) = Possible, but requires additional configuration.

X = Not currently supported.

1) Requires PHP drivers from Microsoft. See wiki for details.
2) Requires additional PHP drivers. See wiki for details.
3) Requires additional PHP drivers. See wiki for details.
4) Requires Oracle instant client software. oci8.so driver for PHP is required, and is included in Bitnami builds. See wiki for details.
5) Requires PDO_IBM module. See this blog post for an example.
6) Requires mongo.so PHP extension.

7) Requires Cassandra drivers. See wiki for details.

8) Requires v8js.so extension.

9) Requires Node.js to be installed on the server.

10) Requires Python to be installed on the server.
